Low-fidelity layouts for the four moments where trust is won or lost. The yellow notes record the design decision on each screen. Screenshots of the built version are in Screenshots_or_Video.

Screen 1: Home board with two lanes

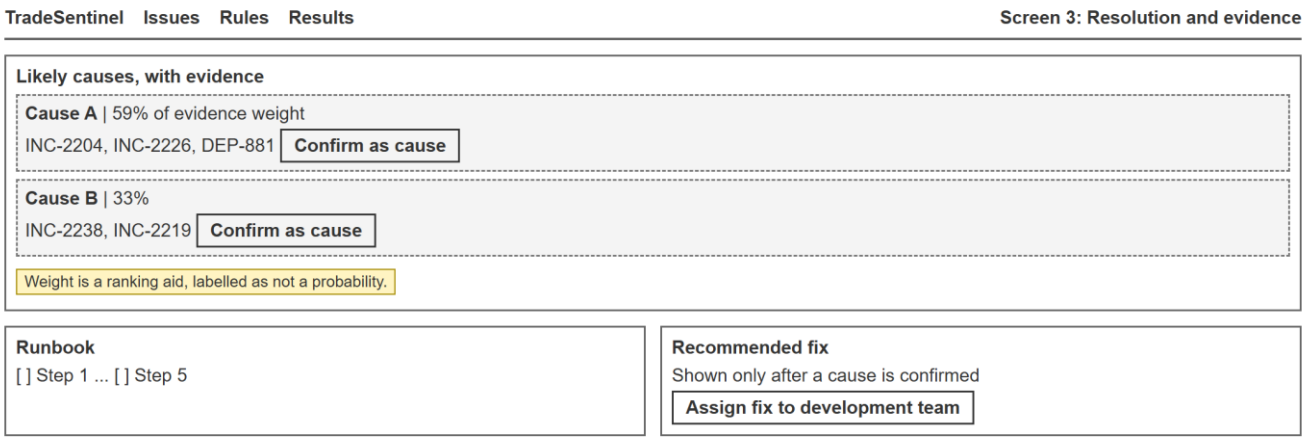

Issues are split by who must act next. The board shows only priority, client, a line of text and what is awaited.

Screen 2: One issue, three steps

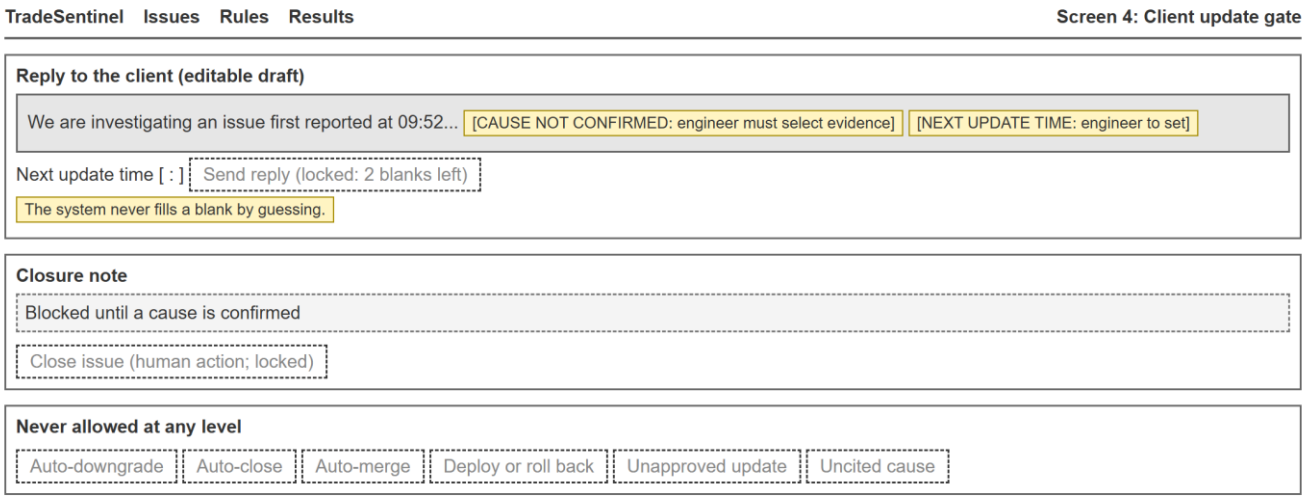

Doubt is stated in one sentence, with the reasons behind a toggle. Nothing is pre-filled at L1, which slows the engineer down on purpose.

Screen 3: Resolution with evidence

Causes carry citations. The fix appears only after a person confirms a cause.

Screen 4: Client update gate

Blanks are shown and block sending. Actions that are never allowed are shown as such.
